BioLife Remedies combines Traditional Chinese Medicine (TCM) and modern research to develop and produce natural herbal products that combat chronic ailments. TCM is a natural medical framework developed in China over 3000 years. During this time, countless medical formulas were developed to treat a multiplicity of chronic ailments.

Under the leadership of Mr. Jack Guo, a group of leading rhizotomists, herbologists, pharmacists, and TCM practitioners began to develop effective natural herbal solutions to remedy chronic ailments. These natural herbal solutions were based on ancient Chinese formulas. Bio Life Bioengineering (China) Inc. (BLBE), wholly owned by BioLife Remedies, was established to conduct R&D and produce these herbal remedies.

BioLife Remedies has successfully developed 11 natural herbal products to remedy various diseases including diabetes, prostatitis, osteoporosis, cerebrovascular disease, cardiac vascular disease, hypertension, menopausal syndrome, male sexual disorder, female sexual disorder, and intelligence development of children. Presently the company is concentrating on the launch of six branded products: Zutrol(TM), Betatrol(TM), Dia-Kids(TM), Di-Agra(TM), Cholesra(TM) and Chi-Agra(TM). Zutrol(TM) and Betatrol(TM).

Terry Xie, a Director of BioLife Remedies Inc., commented, "TCM is a medical framework developed over the period of thousands of years, its safety and effectiveness are proven by generations of TCM practitioners. Today TCM is widely applied in China for treating serious diseases. Our team of researchers is doing a fantastic job in refining TCM formulae into safe and effective products."

The President and the CEO of the Company, Jack Guo stated, "The products we develop at BioLife Remedies are safe for use. We plan to run a monitoring program with top Universities within North America that will demonstrate the safety and the effectiveness of our products."

In a recent interview on Business TV, Jack Guo commented that clinical analysis and research on the BioLife Remedies' products are going to be conducted in North America to demonstrate the effectiveness of the products.
